The Chair of the appropriate Department will notify the student(s) via email when all parties that need to be involved with the investigation have been made aware of the issue. This notification can be proof of acknowledgment of the student’s complaint. All resolutions will be completed within a reasonable amount of time. UNAM - San Antonio will maintain a complete written record of each complaint and how it was resolved in strict confidentiality. If a copy of the complaint or the procedures taken to resolve the matter is needed, a student can ask for a printed copy from the appropriate Department Chair.

The office of the Director will contact the individual(s) involved in the complaint via email or in person to clarify that the matter has been resolved one week from the day of resolution. Five business days after the student was notified of the resolution, the Chair of the appropriate Department will contact the student for a follow-up. If the issue has been resolved, no further action is needed, and the complaint can be closed and finalized for record keeping.

If the issue still persists, the complaint and the resolution must be reviewed for a more final resolution to the issue. A resolution must be met within a reasonable amount of time.

NONDISCRIMINATION POLICY AND COMPLAINT PROCEDURE

- POLICY
  It is the goal of UNAM - San Antonio to provide an educational working environment that provides equal opportunity to all members of the Institution’s community. In accordance with federal and state law, the Institution prohibits unlawful discrimination on the basis of race, color, religion, sex, national origin, age, citizenship, genetic information and veteran status. • **HARASSMENT**
  As a form of discrimination, harassment is defined as verbal or physical conduct that is directed at an individual or group because of race, color, religion, sex, age, disability, citizenship, genetic information, veteran status, or sexual orientation, when such conduct is sufficiently severe, pervasive, or persistent so as to have the purpose or effect of interfering with an individual’s or group’s academic or work performance or of creating a hostile academic or work environment. Constitutionally protected expression cannot be considered harassment under the policy.

• **DISSEMINATION OF POLICY:**

Periodic notices sent to faculty, employees, and students, about the University’s Nondiscrimination Policy will include information about the complaint procedure and will refer individuals to designated offices or additional information.
STUDENT USE OF THE INTERNET

The Internet, the global computer network referred to as the World Wide Web, and electronic communications (e-mail, chat rooms, and other forms of electronic communication) have vast potential to support curriculum and student learning. UNAM - San Antonio believes they should be used in school as a learning resource to educate and to inform.

Use of these tools also encourages an attitude of lifelong learning and offers an opportunity for students to participate in distance learning activities, ask questions of and consult with experts, communicate with other students and individuals, and locate material to meet educational and personal information needs.

UNAM - San Antonio believes the educational opportunities inherent in these tools far outweigh the possibility that users may procure material not consistent with the education goals of the school. However, the Internet and electronic communications are fluid environments in which students may access materials and information from any sources including some that may be harmful to students.

Students shall take responsibility for their own use of computers and computer systems to avoid contact with material or information that may be harmful. Students shall report access to material and information that is obscene, pornographic, or otherwise in violation to this policy to the supervising staff member. If a student becomes aware of other students accessing such material or information, he or she shall report it to the supervising staff member as well.

NO EXPECTATION OF PRIVACY

UNAM - San Antonio computers and computer systems are owned by the Institution and are intended for educational purposes at all times. Students shall have no expectation of privacy when using the Internet or electronic communications. The school reserves the right to monitor, inspect, copy, review, and store at any time and without prior notice, all usage of UNAM - San Antonio computers and computer systems, including all Internet and electronic communications access and transmission/receipt of materials and information. All material and information accessed/received through the school’s computers and computer systems remain the property of the Institution.

Students shall use UNAM - San Antonio computers and computer systems in a responsible, efficient, ethical, and legal manner. Because technology and ways of using technology are constantly evolving, unacceptable use of UNAM - San Antonio computers and computer systems cannot be specifically described in policy. Therefore, examples of unacceptable uses include, but are not limited to, the following:

No student shall access, create, transmit, retransmit or forward material or information:

- That promotes violence or advocates destruction of property including, but not limited to, access to information concerning the manufacturing or purchasing of destructive devices or weapons.
- That is related to UNAM - San Antonio educational objectives.
- That contains pornographic, obscene, or other sexually oriented materials, either as pictures or writings that are intended to stimulate erotic feeling or appeal to prurient interest in nudity, sex, or excretion.
- That harasses, threatens, demeans, or promotes violence or hatred against another person or
group of persons with regard to race, color, sex, religion, national origin, age, marital status,
disability, sexual orientation, or handicap.
- For personal profit, financial gain, advertising, commercial transaction, or political purposes.
- That plagiarizes the work of another without express consent.
- That uses inappropriate or profane language likely to be offensive to others in the school
community.
- That is knowingly false or could be construed as intending to purposely damage another
person’s reputation.
- In violation of any federal or state law, including but not limited to copyrighted material and
material protected by trade secret.
- That contains personal information about themselves or others, including information protected
by confidentiality laws.
- Using another individual’s Internet or electronic communications account without written
permission from that individual.
- That impersonates another or transmits through any anonymous remailer or that accesses fee
services without specific permission from the system administrator.

ONLINE SECURITY

Security on UNAM - San Antonio computer systems is a high priority. Students who identify a security
problem while using the Internet or electronic communications must immediately notify the system
administrator. Students should not demonstrate the problem to other users. Logging on to the Internet
or electronic communications as a system administrator is prohibited. Students shall not:

- Use another person’s password or any other identifier
- Gain or attempt to gain unauthorized access to UNAM - San Antonio computers or computers
systems
- Read, alter, delete, copy, or attempt to do so, electronic communications of other systems users

Any user identified as a security risk, or as having a history of problems with other computer systems
may be denied access to the Internet and electronic device communications.

UNAUTHORIZED SOFTWARE

Students are prohibited from using or possessing any software that has been downloaded or is otherwise
in the user’s possession without appropriate registration and payment of any fees owed to the software
owner.

STUDENT USE OF THE INTERNET IS A PRIVILEGE

Use of the Internet and electronic communications demands personal responsibility and an
understanding of the acceptable and unacceptable uses of such tools. Student use of the Internet and
electronic communications is a privilege, not a right. Failure to follow the use procedures contained in
this policy will result in the loss of the privilege to use these tools and may result in expulsion and/or
legal action. The Institution may deny, revoke, or suspend access to technology or close accounts at any time.

RESPONSIBILITIES IN COMMON AREAS

The Institution’s common areas include the rest areas, waiting area, hallways, restrooms, and the multipurpose room. Because students from every class will be using these areas under the supervision of faculty and staff, it is important to establish rules and expectations that are commonly understood and consistently applied. With such rules in place, staff can focus on encouraging good character among students rather than correcting misbehavior.

Rest Area and Waiting Area: Students will behave showing consideration and respect for others.

Hallways: The hallways of the school will be a safe and quiet environment where people interact with courtesy and respect.

Restrooms: The restrooms at the school will be clean and safe.

Meals: Snacks at the school will be enjoyed in the student lounge in a safe, clean, and friendly environment where people interact with courtesy, manners, and respect.

Before and After School: Students will arrive at and depart from the school in a safe and orderly manner.

NOTE: These policies may be subject to change without notification.
